SUMMARY

CS undergraduate who enjoys turning ideas into things people actually use, from AI-powered platforms built during fast-paced hackathons to everyday problem-solving with a team. I have taken on leadership roles across hackathons, sports, and college team events, and I'm comfortable stepping up, staying calm under pressure, and getting a group moving toward a shared goal.

EDUCATION

Bachelor of Technology in Computer Science and Engineering Vellore Institute of Technology (VIT Bhopal), India	Expected May 2027 CGPA: 8.21/10.0
Higher Secondary Certificate (HSC) Royal Junior College, Dombivli, India	2021 – 2023
Indian Certificate of Secondary Education (ICSE) Omkar International School, Dombivli, India	2008 – 2021

WORK EXPERIENCE

Product Management Intern WeCanServe	Apr 2026 – Jun 2026
- Worked as a Product Management Intern at WeCanServe, a marketing agency, supporting client projects from requirements gathering and roadmapping through execution and final delivery. - Defined and prioritized project requirements, ran stakeholder check-ins, and coordinated timelines and backlogs across teams to keep deliverables on track and aligned with client goals.	

SKILLS

Product: Roadmapping, Prioritization, Feature Planning, Agile, Scrum, Requirements Gathering
Data: SQL, Python, Pandas, NumPy, A/B Testing, Data Analysis
Research: User Interviews, Feedback Analysis, Competitor Analysis, Prototyping, Usability Testing
Tools: Jira, Trello, Notion, Slack, Figma, Google Sheets
Relevant Coursework: DevOps, Software Engineering, Business Analytics, Design Thinking, Cloud Computing

PRODUCT EXPERIENCE

CareerSync AI - AI Resume Builder & Analyzer Product Owner, Full-Stack Team	GitHub
- Identified a common problem where resumes didn't match job requirements, and defined the product plan for AI-based parsing, resume generation, and feedback to solve it. - Flagged reliability as a key trust factor for users, and worked with engineering to build a multi-model fallback system so AI feedback kept working even during API outages.	
Auto ML Pro - Automated Machine Learning Platform Product Lead	GitHub
- Simplified a complex, multi-step data science workflow into a clear, easy-to-follow process for users with no technical background. - Defined requirements for AI agents to automate data cleaning and preparation, cutting manual effort for users, and refined the experience based on tester feedback.	

CERTIFICATIONS

Google IT Support Certificate Google Career Certificates	Feb 2026
DevOps Fundamentals IBM Career Education Program (CEDEV2IN)	Jul 2025

AWARDS & ACHIEVEMENTS

- Competed in **4+ national-level hackathons**, including the 100x Buildathon, driving product ideation and prioritization decisions within cross-functional teams under 24–48 hour deadlines.
- Validated product-market fit for HireAI with **3 signed Letters of Intent** from early-adopter clients, built on insights from 35+ direct user feedback sessions.
